

**STATEMENT BY TRANSPORTATION COALITION OF TENNESSEE
Regarding TRIP Report That Evaluates Tennessee Road & Bridge Conditions,
Congestion, Traffic Safety, Transportation Funding And Economic Development**

January 19, 2016

Much like the Comptroller's study released last year, this is another independent study that illustrates the need for additional revenue for transportation in Tennessee. The Transportation Coalition of Tennessee does not propose a specific financial solution. Our role is to educate the general public and members of the General Assembly of the need while encouraging both the Administration and General Assembly to come up with a comprehensive plan to address the funding situation. Possible new sources of revenue are identified in the Comptroller's study.

Bill Moore

Chairman of Tennessee Infrastructure Alliance and former chief engineer at the Tennessee Department of Transportation
